JIVC IT-Leveranciersdag

6 July 2023

More than 250 IT suppliers present

We ...

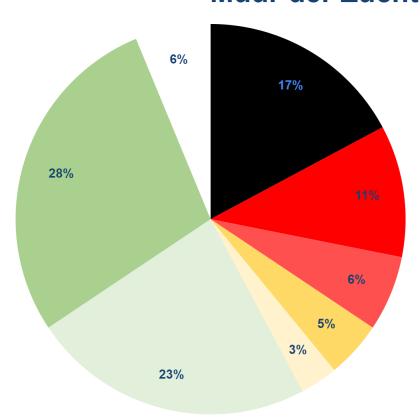

- emphasized the urgency
- explained our ambitions, challenges, and Wicked Problems
- explicitly asked the IT-market for help

JIVC IT-Leveranciersdag

Muur der Zuchten

- One big black box
- Veel kosten maken zonder dat het iets oplevert
- Onboarden als leverancier moet makkelijker
- Door teveel hoepeltjes voor goedkeuring
- Communicatie/informatie moet beter
- Het moet beter, maar er is hoop
- Alles redelijk tot goed
 Het is fantastisch samenwerken!

IT-tables: purpose and concept

The aim of the IT-tables is to ensure a structured dialogue between JIVC and the market in the coming years. We use a matrix of IT tables and matching themes to discuss, solve and convert issues into programs, projects and assignments.

- 19 IT-tables (sept 2023 till june 2024)
- Over 1500 registrations
- Every 3rd Thursday of the month
- Each IT table consists of a mix of existing and new parties
- The output of all IT-tables will be published on https://www.defensie.nl/onderwerpen/adaptieve-krijgsmacht/jivc-leveranciersdialoog

Next steps

IT-table planning

 We will organize various IT-tables in the upcoming months and will update and communicate our planning once ready

IT-table follow up

- We will analyze the obtained information and deepen discussions with select partners as needed.
- We'll transparently share these insights with the market.
- Our ultimate goal is to develop concrete, long-term partnerships.
- In the coming month, we, from IT-PSM, will intensify communication with the market.
- We'll set up exclusive sessions with suppliers who were present at previous IT discussions.

So, please embrace my call to action...

- keep participating & engage proactively
- keep challenging us
- send the right people to the IT-tables
- and start the conversation with us
